WHI: A Legacy to Future Generations

February 28 – March 1, 2006

Natcher Auditorium, NIH Campus

Co-Sponsored by:

Office of Research on Women's Health

National Heart, Lung, and Blood Institute

The WHI--a landmark study in women's health--has important public health implications now and for future generations of women. This unique conference will include:

- Presentations on the primary results for the WHI Dietary Modification and Calcium/Vitamin D clinical trials and the findings released earlier from the two Hormone Trials
- A synthesis of the complex information generated from the WHI observational study and all four clinical trials
- Discussions about the significance of the WHI findings for postmenopausal women's health
- A tribute to the heroic contributions of the 161,808 WHI Participants
- News about the future of WHI:
 - Opportunities for scientific collaboration and analysis of biospecimens to shed light on disease mechanisms
 - The WHI Extension Study

Please share this announcement with your colleagues.

Additional information about the conference and online registration will be posted at <http://www.nhlbi.nih.gov/whi/references.htm> as it becomes available.
